ENCHANT RUSTIC COLLECTION

A Forest Life in the City

Ego presents The Enchant Rustic Collection ...

The elegance of unique hardwoods from the heart of the Forests from across the globe.

The Enchant Rustic Collection is naturally beautiful with amazing, unique patterns and textures from the forests.

It has it's own unique pattern which will make your flooring or house truly one of a kind.

Experience luxury of our ENCHANT RUSTIC WOOD FLOORS with easy maintenance, expert installation and choice.

Bring luxurious and long lasting solid wood floors look alike

in your home with Ego

Enchant Rustic Floors.

- ▶ *Unique EIR surface makes it look like real wood.*
- ▶ *High abrasion resistance makes it more durable.*
- ▶ *Acoustic Floor with 2mm underlayment which makes it noiseless and gives better foot feeling.*
- ▶ *V Groove.*
- ▶ *Size 1215*160*12+2mm.*
- ▶ *Warranty 15 years Residential and 5 years commercial.*

TECHNICAL TEST REPORT

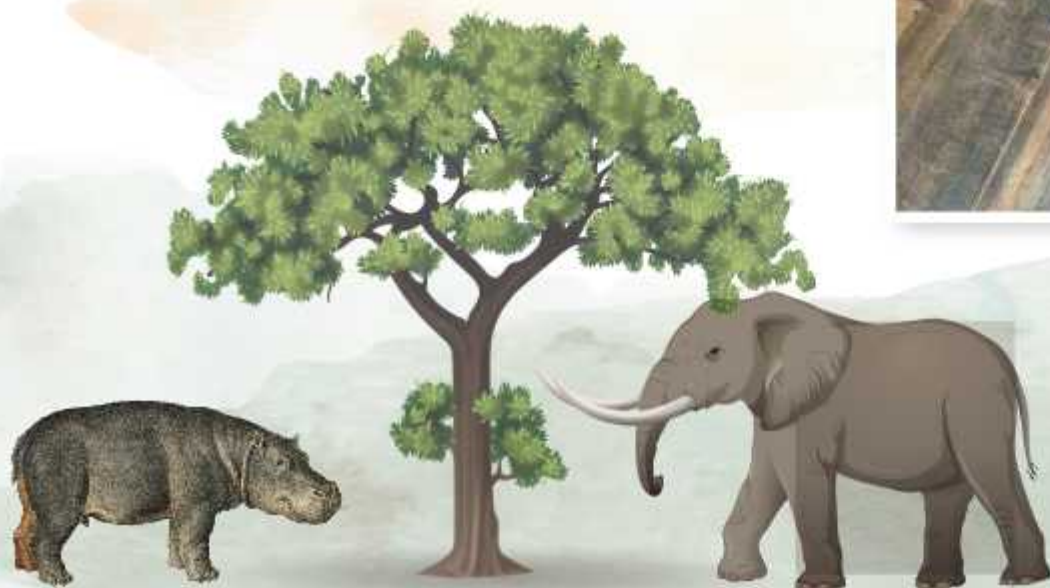

Specifications	Norms	Value
Thickness	EN13329	$\Delta T_{\text{average}} \leq 0.50\text{mm}$ $\Delta T_{\text{max}} - \Delta T_{\text{min}} \leq 0.50\text{mm}$
Length	EN13329	Nominal value : 1215mm $\Delta l \leq 0.5\text{mm}$
Width	EN13329	Nominal value : 196 mm $\Delta W_{\text{average}} \leq 0.1\text{mm}$ $W_{\text{max}} - W_{\text{min}} \leq 0.2\text{mm}$
Density	EN 13329	$\geq 850\text{kg/cbm}$
Wearlayer	EN 10874	Class 32
Humidity	EN 13329	3-10%
Tensile strength perpendicular	EN 13329	$\geq 1.0\text{N/mm}^2$
Surface soundness	EN 13329	$\geq 1.0\text{N/mm}^2$
Abrasion resistance	EN13329	AC4:4000 revolutions (10% more or less)
Bending strength	EN13329	$\geq 30\text{N/mm}^2$
Squareness of the element	EN 13329	$q_{\text{max}} \leq 0.20\text{mm}$
Straightness of the surface layer	EN 13329	$s_{\text{max}} \leq 0.30\text{mm/m}$
Flatness width	EN 13329	Concave $\leq 0.15\%$ Convex $\leq 0.20\%$
Flatness length	EN 13329	Concave $\leq 0.50\%$ Convex $\leq 1.00\%$
Openings between elements	EN13329	$o_{\text{average}} \leq 0.15\text{mm}$ $o_{\text{max}} - o_{\text{min}} \leq 0.20\text{mm}$
Height differences between elements	EN13329	$H_{\text{average}} \leq 0.10\text{mm}$ $H_{\text{max}} \leq 0.2\text{mm}$
Thickness swelling (24hours)	EN13329	$\leq 18\%$
Impact resistance	GB/T18102-2000	$\leq 12\text{mm}$
Emission of formaldehyde	GB/T18102-2000	$\leq 1.5\text{mg/L}$
Colour difference		For each order, we will produce your goods according to your samples.

MIOMBO *Forest*

The Miombo woodlands cover over 900,000 square miles in central Africa. They're home to millions of people, and spread across Angola, Democratic Republic of the Congo, Malawi, Mozambique, Tanzania, Zambia, and Zimbabwe.

*Although the region is dominated by the **Miombo tree**, there are over 300 other species of trees and 8500+ different types of plants.*

They have an amazing array of wildlife, including Giraffes, Rhinos, Elephants, and grazing Antelope.

CONGO *Forest*

Home to around 40 million people, the largest forest in Africa covers much of the continent's central region (approximately covering 1.4 million square miles of it).

Countries located within its vast basin include Angola, Burundi, Cameroon, Central African Republic, Democratic Republic of the Congo, Rwanda, South Sudan, Tanzania, and Zambia.

The Congo Basin Forest is home to thousands of unique species of plants and animals. The diverse array of wildlife species— including Elephants, Chimpanzees, Gorillas, Rhinos, and countless others. There are also over 2000 species of orchids that are endemic to the basin.

Historians believe the Congo has been inhabited for over 50,000 years, and there are still indigenous tribes here that live hunter-gatherer lifestyles.

The forest's thick canopy of trees towers at around 160 feet, and is generally lush green and dense with flora.

MAU *forest*

ego

The Mau Forests Complex (MFC) forms the largest closed-canopy forest ecosystem in Kenya, the largest indigenous montane forest in East Africa with an area of 675,000 acres.

The Mau Forest of Kenya is one of the biggest forests in East Africa, with an area of 675,000 acres.

It has some of the highest rainfall rates in Kenya, and contains the largest water catchment area in the country. There are numerous rivers originating from the forest, which then feed large lakes (including Lake Victoria).

The Mau Forest was traditionally inhabited by the hunter-gatherer civilization of the Ogiek people, but immigration has led to the clearing of much of the forest for settlement.

BLACK *Forest*

Encompassing around 2,300 square miles, Germany's Black Forest (or Schwarzwald) is only the second largest forest in Germany in terms of surface area.

It's mythical woods are at once ominous and endearing, well-traveled and haunting.

The Black Forest is named for its remarkably dense canopy, which causes it to be very dark at the floor level. Even so, it is one of the most beloved tourist destinations in Germany, noted for its old world villages and stunning natural beauty. It's also laden with vineyards, castles, and villages.

It's also a very frequented ski spot, and has a famous spa town called Titisee-Neustadt.

This is where cuckoo clocks come from, as well as countless tales of witches and werewolves.

AMAZON *Forest*

Spreading across much of Brazil, Bolivia, Colombia, Ecuador, French Guiana, Guyana, Peru, and Suriname, the Amazon Rainforest is the most biodiverse and largest rainforest in the world. It covers approximately a vast 2.2 million square miles.

The forest is as dense, hot, and potentially dangerous as it is beautiful. But it's also a treasure trove of plants and wildlife, such as Rosewood, Jaguar, Manatee, and Brazil Nut.

The Amazon is a vast biome that spans eight rapidly developing countries—Brazil, Bolivia, Peru, Ecuador, Colombia, Venezuela, Guyana, and Suriname—and French Guiana, an overseas territory of France.

The landscape contains:

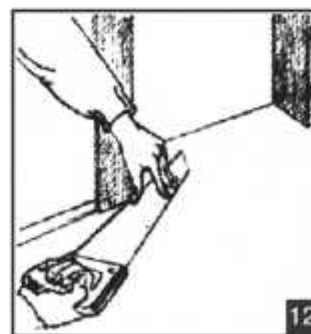

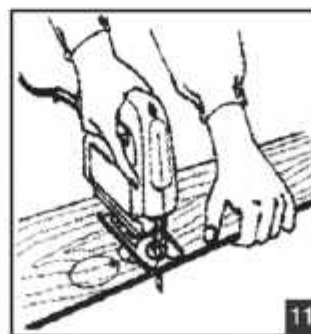

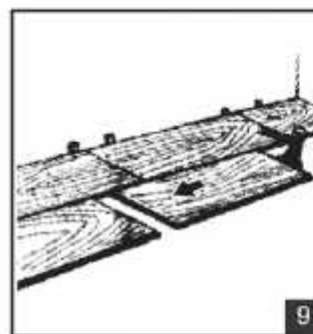

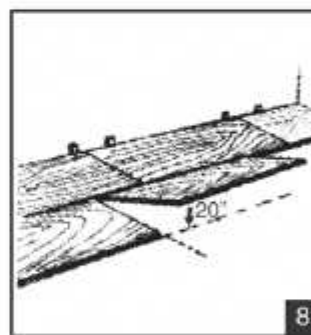

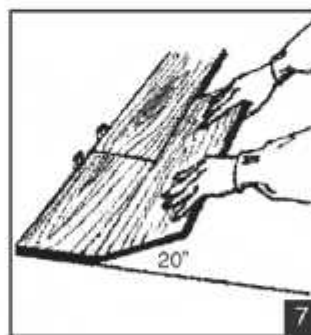

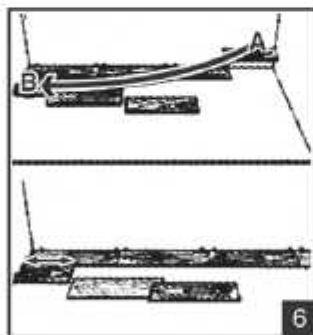

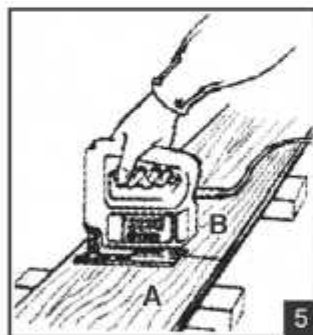

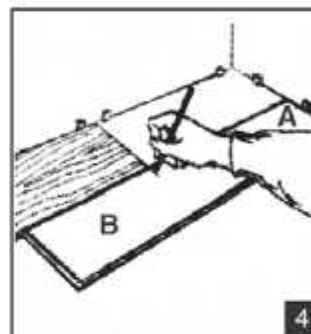

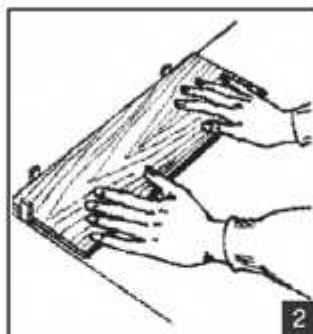

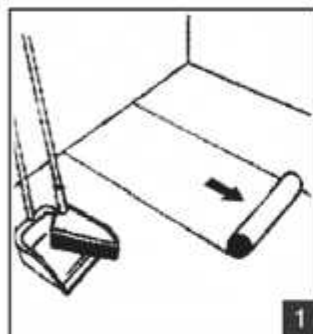

- one in 10 known species on Earth*
- 1.4 billion acres of dense forests, half of the planet's remaining tropical forests*
- the 3,977-mile-long Amazon River, the second-longest river on Earth after the Nile*

Collectively, there are over a million species accounted for in the dense rainforest vast basin.

INSTALLATION

- Installing a floor becomes child's play: A fingertip is enough to join panels – simply unpack, lay together and done. No effort involved – your hammer and block can stay in the tool box.
